

EARTHING TRANSFORMERS

PRODUCT BROCHURE

OVERVIEW

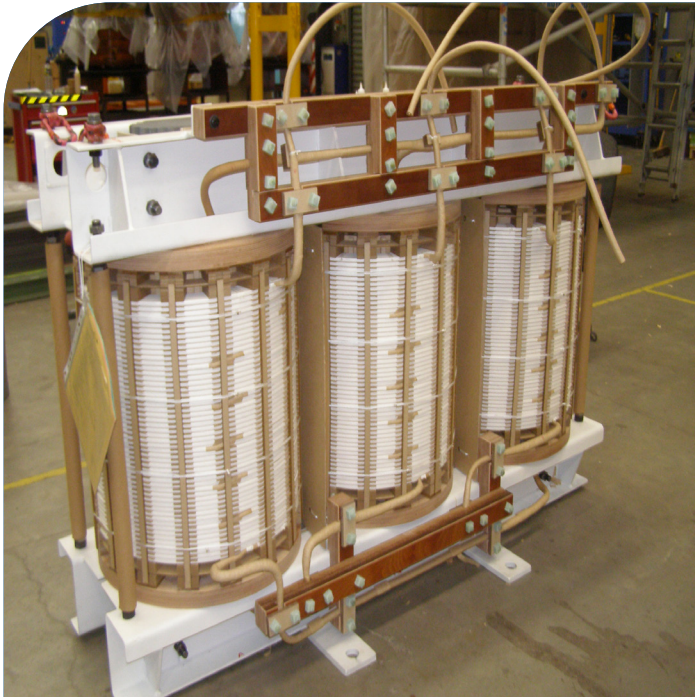

Ampcontrol earthing transformers are custom designed to meet the most rigorous conditions.

We provide units up to 3000 Amps in the neutral for 66,000 volt systems.

Our robust and conservatively designed earthing transformers provide maximum reliability in service.

Our windings use Aramid paper rectangular copper ensuring absolute confidence of performance under the most onerous fault conditions.

Proven short circuit tested designs.

FEATURES

- Conservatively designed
- Custom designed to suite customer requirements
- Fully balanced winding design to minimise axial force
