

Update to PTT Handset

PURPOSE

To inform customers that Ampcontrol will be updating the Voicecom Phone PTT handset to a new version with a different type of PTT button, now referred to as the PTT Handset Round Button. An image of the new arrangement is provided below. This improves the quality of audio and feel during operation. There will be no increase in costs compared to the outgoing PTT handset.

All new PPT Phones ordered under the current 169893 part number will come with the new round style push button.

All new PPT replacement handsets ordered under the current 170365 part number will come with the new round style push button

TARGET AUDIENCE

Electrical Engineering Managers of Mines with VoiceCom Phone Installations, OEMs and Ampcontrol Engineering Departments.

WHY ARE WE CHANGING?

Based on customer feedback we are improving the quality of audio, operator feel and robustness of the PTT button.

The original PTT Handset Bar style will only be available by request.

KEY DATES

The change over will be effective immediately.
