AMPCONTROL AMPS UP SUPPORT OF THE NEWCASTLE JETS SIGNING AS MAJOR PARTNER OF A-LEAGUE WOMEN TEAM FOR 2022/23 LIBERTY SEASON

- Ampcontrol announces first season as Major Partner of the Newcastle Jets A-League Women (ALW) Team for the 2022/23 Liberty A-League season
- The Ampcontrol logo will be represented on the back of the Newcastle Jets A-League Women Team playing jersey
- Newcastle Jets will proudly display the Ampcontrol logo at first home game as they take on Perth Glory at No.2 Sportsground on Saturday 3 December 2022

Ampcontrol has strengthened its commitment to powering the Newcastle Jets by becoming a Major Partner of both the Newcastle Jets Men and Women A-League Teams.

The 2022/23 Liberty A-League season marks the first year Ampcontrol has supported the Women's league.

The Ampcontrol logo will be proudly displayed on the back of the Newcastle Jets A-League Women's playing jersey. For the 2022/23 Liberty A-League season, the Jets will be donning a predominantly gold jersey which is accented by royal blue and red.

Rod Henderson, Ampcontrol Managing Director & CEO, is excited to see Ampcontrol expand their ongoing support of the Newcastle Jets.

"Sport has always been important to the community and we're amped to see women's sporting teams get the recognition and support they deserve. As Ampcontrol continues to strive for innovation, expanding into new industries, the opportunity to expand our support of the Newcastle Jets Football Club to be a Major Partner of the Women's League was a no brainer," says Mr Henderson.

Shane Mattiske, Newcastle Jets Executive Chairman said he welcomes having Ampcontrol on board as a Major Partner of the women's A-League team for the first time.

"Ampcontrol has been an enormous supporter of our Men's team and we're delighted to see that expand into our Women's side for this season. I know the Women's team will be proud to display Ampcontrol on the back of their jerseys and how much they appreciate the support of such a large Hunter-based business," says Mr Mattiske.

The 2022/23 Liberty A-League season is already underway, and the Newcastle Jets will proudly display Ampcontrol on the back of their playing jersey for the first time as they take on Perth Glory at No.2 Sportsground on Saturday 3 December 2022.

"We're amped to be alongside this great club and expanding our support of the Newcastle Jets to extend to the Women's A-League. We can't wait to see Ampcontrol emblazoned on the women's playing jersey as they play against Perth Glory during their first home game of the season," says Mr Henderson.

Ends.

Ampcontrol is Australia's largest privately-owned electrical engineering company leading advanced global manufacturing of award-winning innovations, products, solutions and service to the resources, infrastructure and energy sectors. Founded in Newcastle NSW in 1968, Ampcontrol has grown to over 950 employees across 30 operations worldwide.

About Ampcontrol

- Ampcontrol is Australia's largest privately-owned electrical engineering company leading advanced global manufacturing of award-winning innovations, products, solutions and service to the resources, infrastructure and energy sectors.
- From humble beginnings founded by four friends in a small shed in Newcastle in 1968, Ampcontrol has grown to over 850 employees across 30 operations worldwide.
- Ampcontrol co-founder, Peter Cockbain AM, is named by Engineers Australia as one of Australia's top 100 influential engineers and in 2015 he became a Member of the Order for Australia for his significant services to engineering.
- Locations include New South Wales, Queensland, Victoria, South Australia, Western Australia, Northern Territory, ACT, Asia, India, Mongolia, UK, and France.
- Consists of 6 member companies; Ampcontrol, Captech, CPS National, ResTech, Verico Group, and Austech.
- The largest operation is located in the Hunter, NSW, with a combined manufacturing space totalling over 21,000sqm spread over 10 different sites.
- Designed and built lifesaving emergency ventilator prototypes for the NSW Government in response to the COVID-19 pandemic.
- Developed the world's first IECEx certification for an explosion protected, hermetically sealed, nitrogen filled and pressurised mining transformer.
- Developed the industry's first 132kV emergency response mobile substation that has received RTA approval as a new special class type of vehicle due to its innovative design and ability to meet all road safety requirements.
- Developed Australia's first variable speed drive (VSD) installed on a longwall armored face conveyor in Moranbah North Longwall.
- Designed and developed a breakthrough remote water treatment system that transforms undrinkable water into pure water. Pilot project currently installed in a remote indigenous community in Gillen Bore, Northern Territory.

MULTI-AWARD WINNING ENGINEERING, DESIGN, AND INNOVATION

- 2021 Good Design Award for Excellence In Engineering Design (Solar Qube)
- 2021 Hunter Manufacturing Award for 'Excellence In Product Design' (Solar Qube)
- 2021 Hunter Manufacturing Award for 'Collaboration Partnership' (Hybrid Diesel Electric Boat)
- 2020 Hunter Business Award for Excellence In Innovation & Adaptability for 'Emergency Ventilator Project'
- 2020 Hunter Manufacturing Award for Collaboration Partnership for 'Emergency Ventilator Project'
- 2020 Hunter Manufacturing Award for Manufacturing Pivot for 'Emergency Ventilator Project'
- 2020 Lake Macquarie Business Excellence In Innovation for 'Emergency Ventilator Project'
